Detailed Action

This action is in response to the application filed on 9/16/06.

Acknowledgements

The examiner for this application has changed. Please indicate Examiner Apple as the examiner of record in all future correspondences.

In view of the appeal filed on 9/16/06, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

James Kramer.

Claim Rejections - 35 USC § 103

Art Unit: 3693

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barr (U.S. Patent 5,761,442) in view of Downs (Dictionary of Finance and Investment Terms).

Re claim 1: Barr discloses:

A system comprising:

A database means for storing (see Barr, Figure 1, item 300)

A data processor responsive to price data stored (see Barr, Figure 1, item 310)

A pattern recognition processor (see Barr, Figure 1, item 330)

Generating a results output (see Barr, Figure 1, item 340)

Re claim 2: Barr discloses:

Real-time price data from data vendors (see Barr, Figure 1, item 305)

Re claim 3: Barr discloses:

Price taken from end of day trading records (see Barr, Figure 1, item 305)

Re claim 4: Barr discloses:

Database includes means for storing trading volume and trade size data (see Barr, Figure 1, item 300)

Re claim 5: Barr discloses:

Art Unit: 3693

Testing prediction characteristics via convergence criteria and adjusting system parameters. (see Barr, Figure 1, item 310)

Re claim 6-10: Barr discloses:

Are rejected in view of the above items in claim 1 PLUS:

programming to detect charting feature (including: broadening tops/ head & shoulders/ Triangle tops & bottoms/ rectangle tops & bottoms/ double tops & bottoms)

Although Barr does not have Charting features, Downs claims "Charting features"

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to add Charting features as taught in Downs to Barr.

It is clear that one would be motivated to apply know knowledge to improve performance and prediction modeling.
